

breveCluster Purchasing List

October 2006

The following is a tentative purchase list, as funds become available.

Initial, rough pricing estimates:

Mac Pro workstation/server + software	\$5,600
Network switch (LINKSYS SR224 or SMC EZNET24SW) ..	\$100
UPS (APC BR1200 1200 VA 780 Watts)	\$200
Floor mats for computers	\$100
==== Total =====	\$6,000

Notes:

- Rounding was done up to the nearest hundred.
- Mac Pro price calculated using an educational discount and with tax included.
- Shipping not included explicitly, but hopefully the rounding up accounts for that. (Again, these are rough figures.)
